POWRWHEEL – THE STORY CONTINUES

Following our move to a state-of-the-art factory in Christchurch, Dorset over three years ago Powrwheel Limited has continued to go from strength to strength and is now the UK's number one manufacturer and supplier of caravan moving systems. We have out-sold all other mover suppliers in recent years as more and more customers realise the value for money and peace of mind our products provide.

Unrivalled design and manufacturing expertise

Working to ISO 9001 engineering standards, our fully skilled and trained workforce boasts over 30 years manufacturing experience, of which 20 years includes the design, manufacture and supply of caravan movers. Comprehensive quality auditing of products in our factory means we can offer you the finest quality systems at the most competitive prices available.

The only range of movers with a five-year guarantee

Powrwheel's supreme confidence in its products is reflected in an unbeatable Five-year No Quibble Parts and Labour Guarantee. In the extremely unlikely event of a product failure you can rely on our world-renowned After Sales Service for support. Our trained team of Powrtouch fitters is at your service nationwide - whether you are at home or on holiday. Wherever you are in the UK, a Powrtouch fitter is never far away.

Standard and bespoke solutions

Powrwheel's extensive range covers a moving system for all requirements, from a small trailer tent through to large twin axle caravans. With the right Powrtouch electric mover fitted, your vehicle can tackle all terrain, including gravel, mud and sand, and even 1 in 4 slopes. As an ISO9001 and TUV approved multi-faceted engineering company we can also provide bespoke solutions for non-standard caravans. So if you've been told it's not possible to install a mover, or have any concerns about fitting a system, simply contact Powrwheel for unbiased advice - our technical/design team is often able to provide a solution.

Where to find us

You can view demonstrations and purchase Powrwheel products at a variety of exhibitions, caravan shows and rallies around the country – please visit our website www.powrwheel.com for details. Systems are also available direct from our factory and at most UK Caravan Sales Outlets and Dealers or via the internet.

So remember, before you buy a caravan moving system, consult Powrwheel - the UK's Number One!

Tens of thousands of happy customers cannot be wrong

We would like at this stage to say how much we appreciate the service given to us by your company. We cannot fault it. As for the mover itself we are delighted with it and the ease of use. My husband describes it as a 'god send'. Thank you once again.
E Bromley, Bolton

I would like to thank you for the excellent service I received when ordering my Powrtouch caravan mover. The quality of this product is excellent and the DIY fitting was straight forward. Your customer communication was first class and delivery times were as promised. I will most certainly be recommending you company and product to others. Again many thanks,
George Aitken, Strathmiglo, Fife

Just to thank you and all at Powrwheel for the speedy way in which you dealt with my recent enquiry and subsequent order to upgrade my six and half year old Model 1 for a new Model 3.
Vaughan Smith

RANGE OF POWRTOUCH MOVERS

SINGLE AXLE MODELS

POWRTOUCH COMPACT

The price conscious Powrtouch Compact is a specially designed and manufactured mover to fit smaller single axle caravans up to 1200Kgs. Suitable up to a 1 in 4 slope. The special compact design also makes it ideal also for most pop-up caravans and trailer tents.

POWRTOUCH HEAVY DUTY

The competitively priced Powrtouch Heavy Duty mover is designed and manufactured for the heaviest single axle caravan. Suitable on any slope, this model is exceptionally strong and robust.

THE POWRACTUATOR

The Powractor is an electrical roller engagement and disengagement system that requires no physical effort from you thus further enjoying the benefits of your caravan. The Powractor is designed such that it can be retrospectively fitted to all previous versions of Powrtouch.

TWIN AXLE MODELS

POWRTOUCH STANDARD TWIN

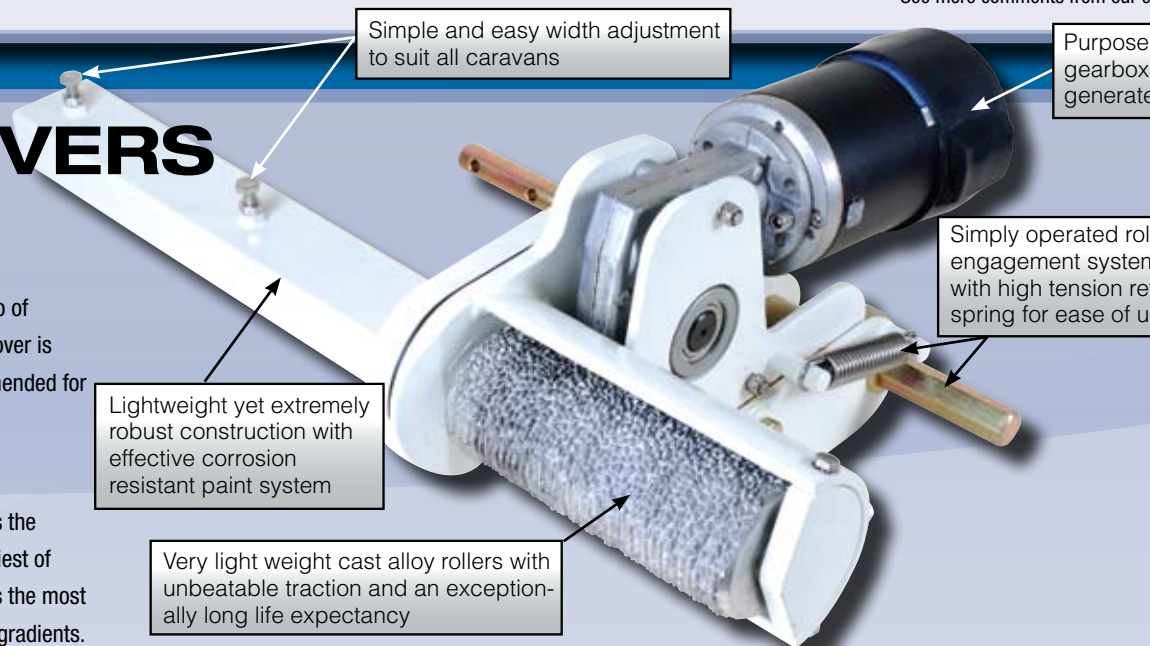

The tried and tested Powrtouch Twin Axle mover drives two of the caravan's wheels (rear wheels recommended). This mover is designed to move caravans up to 1650/1700Kgs. Recommended for slopes of less than 1 in 10.

POWRTOUCH ALL WHEEL DRIVE

The specially designed Powrtouch All Wheel Drive mover is the ultimate twin axle caravan system that will move the heaviest of twin axle caravans by driving all four wheels. This provides the most effective turning available and suitable for all terrains and gradients.

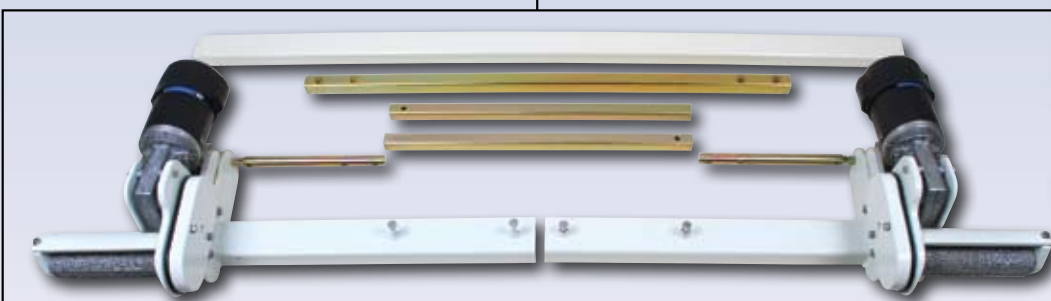

THE POWRBAR

The Powrbar (cross actuation system) allows both rollers to be engaged or disengaged from one side of the caravan - a must if you cannot fully access one side of the caravan where parked or stored.

An advanced electronics control system designed using state of the art technologies ensuring that remote controlled operation is extremely smooth and effortless

Mechanically sturdy but still a lightweight system with easily fitted Powrbar for cross actuation. No breakable plastic covers that will retain dirt, condensation and water which can also disguise potentially poor quality engineering

Effortless parking... at the touch of a button
